Career Objectives

Design, develop, and test software programs for a variety of industries, including gaming, finance, healthcare, and more.

Collaborate with development and operations teams to improve software release processes, automate tasks, and ensure system stability and scalability.

Project Name — *Jumuia*

Jumuia is basically a web page for an animal feeds company that I have been working on for some time now.

You can access it and other projects from my github account *@mkUuU*
